

NeuroAgeTM

Food supplements to support cognitive function, support alertness and promote sleep

NeuroAgeTM is a range of food supplements designed to support alertness, cognitive function and mental performance in a healthy brain.

The supportive components have been extensively studied and there are several clinical studies that show their action in supporting cognitive function.

There are three products within the NeuroAgeTM range, and each has a special focus to address needs associated with cognitive function.

NeuroAgeTM

Food supplements to support cognitive function,
support alertness and promote sleep

NeuroAgeTM

Contains an effective combination of ingredients that have been clinically tested in combination to help support an ageing brain. Key benefits include maintaining healthy cognitive function, memory and concentration.

NeuroAgeTM NRG

As well as contributing to maintaining brain function, concentration and memory, NeuroAgeTM NRG has been specially formulated to maintain alertness when needed. It includes caffeine – studies show how its properties help maintain concentration and alertness.

NeuroAgeTM Sleep

Helps to maintain brain function, concentration and memory in a healthy brain.

It also helps to promote sleep and reduces the time taken to fall asleep.
