

Recalcifying & Whitening Range

Dual Powered by SensiShield® (Hydroxyapatite) and iQ+ ActiveOxi Technology® (Stabilised Chlorine Dioxide and Fluoride)

Clinically proven technology, developed for sensitive teeth in conjunction with the Institute of Dentistry at Queen Mary University London (Barts and The London School of Medicine and Dentistry).

The Recalcifying & Whitening range offers the same benefits as the long standing original UltraDEX range and in addition has **SensiShield® Technology**

- PROTECTS teeth and gums; RESTORES natural whiteness and ELIMINATES Volatile Sulphur Compounds (VSC) for 12 hours fresh breath confidence
- Builds a protective shield over the enamel surface
- Recalcifies tooth surfaces, fills in microscopic enamel cracks and occludes dentine tubules
- Leaves teeth smoother, brighter and more resistant to staining and acidic food & drink

“The Recalcifying & Whitening range does it all, the best products for people with sensitive teeth, due to their unique formulation. They provide a host of benefits.”

Ashish B. Parmar of Smile Design by Ash, Leading Aesthetic Dentist

PERFORMANCE ORAL CARE

Recalcifying & Whitening Toothpaste

- Clinically proven technology, developed for sensitive teeth
- Low abrasion formula (RDA 38), gently oxidises organic stains
- Ideal for daily use or as part of a whitening maintenance programme
- Non-foaming and free from Sodium Lauryl Sulphate, which has been linked in research studies to recurrent Aphthous Ulcers
- Contains Sodium Monofluorophosphate (1000 ppm Fluoride) to help strengthen teeth
- Fresh mint taste, 75ml tube

"This is the only toothpaste that keeps my gums healthy, my teeth white and my breath fresh. No other toothpaste does all of that in one. It is also not tested on animals, which is a bonus."

Mrs J. London

Recalcifying & Whitening Daily Oral Rinse

- Clinically proven technology, developed for sensitive teeth
- Alcohol-free, mineral-based rinse eliminates bacteria, gently oxidises stains and helps to fight gum problems, tooth decay and plaque
- Ideal for daily use or as part of a whitening maintenance programme
- Contains Sodium Monofluorophosphate (660 ppm Fluoride) to help strengthen teeth
- Fresh mint flavour, 250ml

"The mouthwash seemed to leave a coating on my teeth which left them feeling smooth and protected." Mr J. B. Chesterfield
